PROFESSIONAL SUMMARY

SOFTWARE ENGINEER

Results-driven Software Engineer with 5+ years of experience in full-stack development, leveraging expertise in .NET, AWS, React, Node.js, and TypeScript to build and scale production-grade applications. Skilled in modernizing legacy systems, optimizing backend performance, and automating workflows that enhance developer productivity and business outcomes. Adept at cross-functional collaboration, Agile delivery, and integrating AI-assisted tools (GitHub Copilot, ChatGPT Codex) to accelerate development lifecycles and code quality. Committed to writing clean, testable, and maintainable code that drives innovation and measurable results.

Core Skills:

Full-Stack Software Development, Cloud Infrastructure Engineering, API Design & Integration, Backend Performance Optimization, Agile & Scrum Methodologies, Software Modernization, Continuous Integration & Deployment (CI/CD), Cross-Functional Collaboration, Test Automation & Quality Assurance, Code Refactoring & Maintenance, Application Scalability, AI-Assisted Development, Database Architecture & Optimization, Microservices Development, UI/UX Implementation, System Debugging & Troubleshooting, Technical Documentation, Problem Solving & Analytical Thinking

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

Aug 2025 – Present

Faroe, Remote

- Contributed to the architecture and scaling of a next-generation insurtech platform, automating insurance onboarding workflows to reduce manual processing time by 40%.
- Designed and implemented Next.js and TypeScript components supporting responsive, data-driven UI experiences for real-time customer interactions.
- Developed Node.js backend microservices to handle asynchronous API calls, data pipelines, and secure integrations with third-party systems.
- Partnered with product and UX teams to enhance user journey efficiency, increasing customer satisfaction scores by 15% within the first release cycle.
- Implemented AI-assisted development workflows and refined repository structures, improving code clarity and team development velocity by 25%.

SOFTWARE ENGINEER

Oct 2023 – Apr 2025

The Hartford, New York, NY

- Led enterprise-wide **.NET 4.8 modernization efforts** across 160+ codebases, designing and automating upgrade scripts that reduced manual intervention by **80%**.
- Refactored high-priority legacy applications, reducing **technical debt by 35%** and increasing codebase maintainability for faster deployment cycles.
- Implemented backend optimization strategies that decreased API response latency by **30%**, directly enhancing user experience and retention.
- Collaborated closely with QA and DevOps to integrate **CI/CD pipelines** in Jenkins and Azure DevOps, cutting deployment time by **50%** and eliminating recurring build issues.
- Acted as a technical liaison between software teams and business stakeholders, ensuring all modernization initiatives aligned with compliance and performance goals.

SOFTWARE ENGINEER

Dec 2021 – May 2023

American Express, New York, NY

- Designed and deployed a PDF upload and validation API, reducing system errors by 30% and lowering customer complaint rates by 20% across digital service platforms.
- Enhanced transaction systems managing over \$9B in capital for 220,000+ SMB clients, optimizing data integrity and improving processing throughput by 15%.
- Rebuilt React-based email tracking dashboards, improving performance and data visualization accuracy, cutting email-related system errors by 25%.
- Implemented advanced error logging, exception handling, and monitoring tools (Datadog, AWS CloudWatch), reducing average troubleshooting time by 25%.
- Partnered with global teams to align system releases with international data privacy and PCI compliance standards.

SOFTWARE ENGINEER

Mar 2021 – Sep 2021

Blend, New York, NY

- Strengthened platform reliability by increasing **unit test coverage by 10%** in the first month using Jest and Supertest, reducing post-release incidents.
- Refactored key Node.js services to improve async handling and runtime efficiency, reducing API processing time by 20%.
- Integrated RESTful credit rate check APIs ensuring compliance with Wells Fargo's financial and security requirements, improving data validation accuracy.
- Supported migration of monolithic services into modularized microservices, simplifying maintenance and scalability for future updates.

ADDITIONAL EXPERIENCE

FRONT-END WEB DEVELOPER (FREELANCE)

Oct 2019 – Feb 2021

Independent Contract, New York, NY

MENTORSHIP COORDINATOR

Oct 2019 – Feb 2021

Blacks In Technology, New York, NY

TECHNICAL PROFICIENCIES

Languages & Frameworks: JavaScript, TypeScript, C#, Node.js, React, Angular, .NET (4.8+)

Databases: PostgreSQL, SQL Server, MongoDB

Cloud & Infrastructure: AWS (EC2, S3, Lambda, CloudWatch), Terraform

Testing Tools: Jest, Supertest, NUnit, Mocha

Development Tools: Git, GitHub, Visual Studio, VS Code, Cursor IDE, Docker, ChatGPT Codex

Methodologies: Agile/Scrum, TDD, CI/CD Automation, System Debugging, Code Review

EDUCATION & CERTIFICATION

City College of New York (CUNY), *New York, NY*
Bachelor of Arts in International Relations

2017
